PROJECTS

CRIME RECORD MANAGEMENT SYSTEM   DECEMBER 2023
- Objective**:** A Crime Record Management System (CRMS) is designed to efficiently store, manage, and retrieve crime-related data, including criminal records, case details, and investigation reports.
- Key Features: The system enables quick data entry, search, and retrieval of crime records, facilitates case tracking, and enhances coordination between different departments.

DHARMA SEVA-FOOD WASTE MANAGEMENT   MAY 2024
- Objective: Dharma Seva – Food Waste Management aims to minimize food waste by collecting surplus food from restaurants, events, and households and redistributing it to those in need, ensuring sustainable and ethical food utilization.
- Key Features: The project includes food collection, quality assessment, and efficient distribution through volunteer networks and NGOs. It leverages technology for tracking donations, optimizing logistics, and promoting awareness about food waste reduction and social responsibility.

PARKIT -PARKING SLOT BOOKING   NOVEMBER 2024
- Objective: ParkIT is a smart parking slot booking system designed to help users find and reserve parking spaces in advance, reducing congestion and saving time.
- Key Features: The system provides real-time availability updates, secure online booking, digital payment options, and navigation assistance to the reserved parking spot, enhancing convenience and efficiency for users.
